

Caroline County Daycare Association

One of oldest scientific institutions in the United States, the Maryland Science Center is a learning center for all ages and was originally a meeting place for an amateur scientific society where members would discuss papers on a variety of natural science topics. Let your mind and senses wander as you join us for a day to take in the activities the Maryland Science Center brings to us.

public library in Denton Maryland

2nd floor large meeting room

May 20th from 9am till 4pm.

Speaker Miriam Krause

All workshops are MSDE certified for 3 hours Core of Knowledge in Curriculum. They are designed for teachers of 3-5 year-old, to be hands-on minds-on experiences.

Science on a Shoestring

9am till noon

Science on a shoestring will provide providers with the resources and the mindset to create science materials for their children from free or low cost items. 3 clock hours in Curriculum.

Break for Lunch (lunch will be provided)

Easy Early Engineering

1pm – 4pm

We've all become comfortable with the acronym STEM (Science, Technology, Engineering, and Math) but some STEM areas get more attention in our daycares than others. Join us as we explore engineering, the often neglected third letter in STEM. We'll become comfortable engineers and focus on how to incorporate it into our daycares. 3 clock hours in Curriculum.
