Home Visiting Consortium (HVC)
HVC Mission

To ensure coordination and collaboration between public and private partners in the planning, implementation and sustainability of evidence-based and promising practice home visiting programs in Maryland.
HVC Vision

All vulnerable Maryland families with young children have access to high-quality, well-coordinated home visiting services that are family-centered and results driven.
History of HVC Consortium

1) Create a home visiting oversight committee;

2) Develop a consolidated and unified grant process to fund home visiting;

3) Coordinate data collection, monitoring and evaluation, and

4) Develop a single point of entry.
History of HVC cont...

- Structure and function of the Home Visiting Consortium remained the same until 2007;
- Home Visiting Consortium was contracted out to Maryland Family Network beginning in 2008;
- Between 2008 and 2010, Maryland Family Network facilitated quarterly meetings of the Home Visiting Consortium;
- In 2010, the Home Visiting Consortium focused its efforts on the planning and coordination of the Annual Home Visitors Conference.
With the award of MIECHV funding to the state, the Home Visiting Consortium reconvened in the fall of 2015, with MSDE and MDH as co-facilitators, with the purpose of coordinating home visiting efforts across funding streams and agencies.
Legislation and Data
Maryland Legislation

Home Visiting Accountability Act of 2012

• Aligns Maryland state funding of evidence based home visiting with federal policy

• Requires a biannual report to the Governor on the outcomes related to state funded home visiting
Maryland Legislation

In March of 2014, standardized reporting measures were adopted by the Children’s Cabinet to evaluate home visiting. The standardized measures were grouped into five domains:
## Governor’s Report

<table>
<thead>
<tr>
<th>Domain</th>
<th>Standardized Measures</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Child Health</strong></td>
<td>% of enrolled children receiving well-child visits per American Academy of Pediatrics recommendations.</td>
</tr>
<tr>
<td><strong>Maternal Mental Health</strong></td>
<td>% of enrolled mothers screened for mental health; % of enrolled mothers referred to mental health services; % of referred mothers who have received supplemental mental health services; % of enrolled mothers who score over the clinical cut-point for parenting stress according to the Parenting Stress Index or other appropriate tool.</td>
</tr>
<tr>
<td><strong>Typical Child Development</strong></td>
<td>% of enrolled children whose development is scored as “typical” according to the Ages and Stages Questionnaires; % of enrolled children scored as “typical” according to the Ages and Stages Questionnaires-Social Emotional.</td>
</tr>
<tr>
<td><strong>Children’s Special Needs</strong></td>
<td>% of enrolled children referred to Part C/Early Intervention and Part B services for special needs.</td>
</tr>
<tr>
<td><strong>Relationships</strong></td>
<td>% of mothers with an increase in parenting behavior and improved parent-child relationship; % of mothers who were screened for intimate partner violence; % of mothers who screened positive for Intimate Partner Violence; % of mothers who completed safety plans within 24 hours of screening.</td>
</tr>
</tbody>

*Other pertains to both evidence-based and promising practice programs that operate in individual localities

**One program in FY 2015 reported data but did not identify the program or jurisdiction
FY 2017 Maryland Home Visiting Data Survey Results

58 Home Visiting Sites Reporting
Representing all 24 of Maryland’s jurisdictions

4,602 Women/Families Served
3,947 Children 0–5 Served

Child Health Measures

- 95% of children up-to-date with most recent well-child visit
- 74% of children screened for child development, 72% for social emotional development
- 14% of children suspected of developmental delay, 4% suspected of social emotional delay
- 5% of all children served receive IDEA Part B or C services

Maternal Health Measures

- 73% of women screened for maternal depression
- 92% of women screened for substance use
- 85% of women screened for high parenting stress

Family Relationship Measures

- 72% of women have improved parent-child relationships
- 94% of women screened for intimate partner violence

Babies born healthy, family bonds strong and supportive, families are connected to essential community resources and children enter school ready to learn
Workforce Support
Home Visitor Training Certificate Program

Seven-day comprehensive training.
Topics include: 1) effective communication and motivating families, 2) healthy relationships and domestic violence, 3) parenting and child development, 4) mental health, 5) substance use and 6) cultural sensitivity.
Continuous Quality Improvement (CQI)

A continuous and ongoing effort to achieve measurable improvements in quality

- Topics: referral to enrollment, family retention, depression screening, family caseloads, and assessments of safe sleep, among others.

- Since rolling out CQI to all MIECHV sites, we have seen great improvement in the topics above. Home visitors and supervisors use the CQI process as a measure of improvement for areas specific to their programs.

- In fiscal year 2018, sites will focus specifically on family retention and data collection issues as well as topics of their choice.
