GOAL 5

TRANSITIONS

FAMILY ENGAGEMENT INITIATIVES SHOULD SUPPORT FAMILIES THROUGH THE CARE AND EDUCATION TRANSITIONS OF EARLY CHILDHOOD

When a child transitions to a new early care and education provider or to the formal education system, the child and the family change setting, teacher, and learning culture. These transitions are challenging for parents and families, and often for providers and teachers, to navigate. Therefore, Maryland initiatives and the practices of early care and education providers should support families as they make transitions with their children to new learning environments.

We talk a lot about transitions and try to support parents in the many transitions families have: Kindergarten, daily routines, into and out of different early care and education programs. What is meant by transitions and why can this be so challenging? Transition means change. Change can be difficult for many people, especially young children. For example, in a structured environment, young children are expected to stop playing and move easily into the next activity. They may be expected to transition into new programs or different activities that may be unknown to them because there are different rules; therefore, they do not know what to expect. This can be difficult for children and sometimes for their parents as well.

DEFINITION OF EDUCATIONAL TRANSITIONS

Changes in educational providers, programs, situations, or age/grade levels.

PROGRAM FOUNDATIONS

PROGRAM LEADERSHIP

To ensure transition strategies are in place to support all families and all types of transitions, effective leadership is essential. Program leadership can create and promote policies and procedures to ensure smooth transitions.

For example, early childhood programs that are accredited through the Maryland State Department of Education (MSDE) are required to develop transition plans for children entering and/or moving to a new group of children or program that communicates children’s individual strengths and needs. Specifically, programs need to show the following:

- A written plan/policy for drop off and pick up.
- A system of noting when children and youth arrive, when they leave, and with whom they leave.
- Written plans/activities with local schools to connect school and child care staff.
- Evidence that staff and families are engaged in practices that encourage children’s smooth transitions when entering a program and throughout the program.

For more information on MSDE Accreditation, please see the Resource Section.
Families have many different options available within the child care community. Child care providers should be aware of the range of services available in their area, including early intervention services and public pre-k, and share these resources with families as needed. This helps support families as they learn to navigate these educational systems and advocate for their children. The following is a chart providing strategies and resources to help programs support parents during transitions.

SECTION 2: GOAL 5

FAMILY PARTNERSHIPS

When we are working with families we may find that they are struggling with specific transitions. They might seem overwhelmed and not know where to begin. We want to make them feel as prepared as they can be when they are navigating educational services or entering new programs.

- When transitioning to new programs or different services, families often need help identifying and understanding quality criteria in early childhood settings. One simple way to help families with this is by referring families to Maryland EXCELS and showing them how to use this resource. This helps parents understand the programs in their area, if the services offered are right for their family, and if they are a high quality program. For more information on MD EXCELS, see the Resource Section.

- Families may have questions about early intervention or preschool special education services for their child. Providers can connect families with their local Family Support Services Coordinator, a parent of a child with disabilities who has direct experience with their child receiving services and who is knowledgeable of their rights under the Individuals with Disabilities Education Act (IDEA). For a directory listing of local Family Support Services Coordinators, as well as information about parental rights under the IDEA, please see the Resource Section.

- Navigating the early intervention and preschool special education systems can at times feel challenging and overwhelming to families. You can support families by offering to attend an IFSP or IEP team meeting with them, as both a “second set of ears” and to contribute important information you have about how the child functions in your program. IFSP and IEP team meetings can sometimes feel intimidating, so here are a few tips you can share with parents to make them feel more comfortable and prepared.

FAMILY VOICE

The teacher at my son’s school spoke to me regarding my son’s listening skills and asked if I had his hearing checked. I had checked and his hearing was fine, however, after the evaluation, we found out that he had speech concerns. He is now enrolled in a Prekindergarten program that picks him up and brings him back to the center seamlessly.

- Parent, Raspberry Children’s Center, Charles County, MD
COMMUNITY PARTNERSHIPS

Often times, early childhood programs and services work with some of the same children and families. Therefore, it makes sense to work together and establish community partnerships to truly be effective when supporting effective transitions. Here are some ways that providers can work together in the community to support families.

- Attend and participate in community meetings and initiatives that increase program capacity to respond to the needs and interests of families.
- Help coordinate services for children and families as they transition from one early childhood setting to another, private or public, child care or elementary school.
- Work together with the Local Infants and Toddlers Program and Local School System Child Find Office to share information with families about resources and services for children with disabilities, including any special health care needs. Remember Memorandums of Understanding, known as MOUs, are a good practice. Form a written partnership agreement as to how programs in the community will work together to support transitions for families and children.

Your local Early Childhood Advisory Council is a great place to meet representatives from all child and family serving agencies. By participating in these meetings, you can learn information about community partners such as preschool special education and early intervention services, health services, Judy Centers, or Child Care Resource and Referral Centers. You can also network with organizations and programs to form partnerships to better support your families with transitions. For more information on Local Early Childhood Advisory Councils, see the Resource Section.

By working with your community partners and communicating between programs, you can find ways to ensure smooth transitions for children and families.

TRANSITION TO KINDERGARTEN

Preparing families is essential as children transition from early childhood programs to a formal school setting and throughout their school age years to support students’ academic, social, emotional, and physical needs. As we already know, fostering a relationship between home and school helps to build relationships with families that support their well-being, sustain strong parent-child relationships, and provide opportunities for ongoing learning and development.

When families are equal partners, students have better attendance, better academic performance, and a more successful pathway into a formal classroom setting. Early childhood programs must be intentional and culturally responsive in their efforts to engage all families, just as schools must be as equally intentional to reach out to early childhood programs to support families in this process.

Children and families may experience the following when transitioning into kindergarten:

- Being the youngest students in a large elementary school
- Riding the bus or walking to school for the first time
- Meeting teachers and peers
- Being responsible for completing homework
- Adjusting to a longer day
- Eating in the cafeteria
- Remembering to bring multiple items to school

To help alleviate the stress of the transition to kindergarten, teachers and providers can:

- Identify the elementary schools in your area for your parents
- Find out about any transition activities at the school or at the library and refer parents
- Bring school system representatives to your program to talk about the transition to kindergarten
- Ask children and families to share their questions and concerns about the transition to kindergarten
- Let children practice being a kindergartnerer by providing school materials in the dramatic play area
- Organize a field trip to the local school to let children see a kindergarten classroom and the cafeteria
TEACHING AND LEARNING

We all understand how having transition strategies help in the classroom, but how does this impact teaching and learning? When parents have prepared their children for their transitions, whether it is within their daily routine or moving between programs, children will come to school more confident and ready to learn. We can continue this support in the classroom by:

- Giving families opportunities to discuss their observations and concerns about their child’s strengths and challenges relevant to their transitions to and from the program, their daily routine, which can include information about other early care and education settings. This gives the provider an opportunity to give the parent needed information and resources and also helps the parent problem solve if needed.

- Helping parents understand how they can help prepare their child for school. Share information with families about activities and everyday interactions with children that promote school readiness as outlined by the Maryland Early Learning Standards. For more information on Maryland Early Learning Standards, see the Resource Section.

- Providing families with information about child development and the impact of transitions on children across early childhood and school settings.

EDUCATOR VOICE

Kid’s Campus Early Learning Center supports transitions for children by easing both children and parents into new routines and expectations and by collaborating with the local school system in support of the child.

Strategies used to make this happen include allowing the child to spend time in the new classroom prior to the permanent move. This allows children some time to get to know the teachers in the next room, meet new friends or reacquaint with old ones, and ease into a new environment. It allows the teacher to gain a little more insight into the child’s development or to plan instruction. We provide the parents a transition document that tells them what to expect in the next room. While some rooms have little differences in routines and expectations, others can be quite different. For example, we teach children to drink from a small cup rather than a sippy cup in our two year old room and that is information the parent should know and anticipate prior to the move.

As children move on to kindergarten, we partner with the local school system and take children to a kindergarten visitation day. In advance of the visit, we read books to the children about going to public school, riding the school bus, making new friends, and meeting new teachers. Our goal is to get them excited about their new adventure. We provide kindergarten registration and kindergarten orientation dates to parents in an effort to help remind busy parents about important timelines. This, in turn, helps the school to effectively staff kindergarten rooms rather than hire a teacher at the last minute. On the first day of school, we work our parents to complete some pictures and see their child off as they ride the school bus to kindergarten. In advance of the first day, we notify parents of the bus number so that they can help their child memorize it. We also create labels for the child to wear on their shirt with their bus number for the first week of school.

Transitions also occur for students with special needs who may be transitioning to public school for additional supports prior to kindergarten or children that are already in school and attend our before and after care program. It is very important for child care providers, families, and the child’s teacher to communicate about the needs of the child. We often ask our families to inform us of any IEP meetings so that we may also attend and learn what supports the child is receiving at the school level that we may also be able to duplicate in our program. We have found this communication to be extremely beneficial for the child as it helps establish continuity in routines, forms of communication, and strategies or supports to meet their needs. Even though the child may be served in different settings if all the partners are working to help the child (parents, child care teachers, school teachers, doctors or therapists), we see significant developmental gains.

The positive effects we see from these practices include children who are able to transition more easily into a new routine and may even be excited about the change, parents who are at ease knowing the expectations of what comes next, and educators and doctors who are able to help a child make developmental gains by having insights into development in different settings.

- Kid’s Campus Early Learning Center, Calvert County, MD

REFLECTION

Children and families go through transitions every day and they can be challenging. This is an opportunity for us to engage families by asking about and responding to their needs, collaborating with teaching and program staff as well as other community programs, and building relationships between all members of a child’s educational support system—all to ensure a child’s success!
